

## Quiz 2 – Question 8

1. Create a new Java project in VSCode, and if you do not remember the steps, please consult Part 1 of today's exercise.
2. Download and move the file PeevishPeter.jar into the **/lib** folder of your new Java project
3. Type out the code provided to you in Quiz 2, question 8 as the file Driver.java **while** making the necessary changes so that there are no syntax errors, and there are no Java convention violations that you can see.
4. Once Driver.java can successfully compile & run, and it produces an output, wave me down so that I can sign off on your work.
